

Gosha Tcherednitchenko

Full-stack software engineer — London, U.K.

gosha@gosha.net | <https://gosha.net> | <https://github.com/goshatch>

I value product insight and care for the people who use that product over technical dogmatism, and I know when “I don’t know, but let me find out” is the best possible answer.

Relevant work experience

- 2021–now **Indeed Flex** (London, U.K.) Software engineer (contract)
Full-stack engineer focusing on elevating internal tooling during a period of rapid growth and transformation for the business. Driving documentation efforts and engineering processes, mentoring junior engineers and helping onboard them into a large engineering organisation.
STACK: TypeScript, React, Ruby on Rails
- 2019–2020 **Natural Sitter** (Remote) Tech lead (contract)
As the sole engineer on a 3-person team, designed, built, and launched a pet-sitting platform serving the Tokyo area, together with the supporting infrastructure — CI/CD, payments, etc.
STACK: Ruby on Rails, Stimulus/Hotwire
- 2016–2017 **Moneytree K.K.** (Tokyo, Japan) Software engineer (contract)
As part of Moneytree’s front-end engineering team, helped build the mobile Web app to feature parity with native apps, and helped migrate the tooling from Angular to React.
STACK: Angular, React, Ruby on Rails
- 2013–2016 **AQ** (Tokyo, Japan) Technical director, THEN Software engineer (contract)
As AQ’s first engineering hire, hired and built an internal engineering team, and put in place engineering systems, processes, and best practices. The team delivered diverse client projects, ranging from prototyping work to full-scale web apps, as well as technical mentoring to clients. By the end of my tenure, AQ has acquired the capability of taking on engineering work in addition to the company’s well-established design business.
STACK: Angular, TypeScript, Ruby on Rails
- 2011–2013 **COOKPAD Inc.** (Tokyo, Japan) UI Engineer
Helped bring a mobile-first Web UI to one of the world’s largest Rails apps, serving a multi-million-strong audience on a daily basis.
STACK: HTML/CSS, Ruby on Rails
- 2010–2011 **Local Republic** (Berlin, Germany) Co-founder
Co-founded a civic tech startup. Drove UI/UX design and development, customer success.
STACK: HTML/CSS, Ruby on Rails

Education

- 2019 **Royal College of Art**, M.A. Photography
- 2010 **Keio School of Media Design** × **P2PU**, Digital Journalism
- 2005 **EPITECH**, M.Sc. Information Technology

Tech stack

Primarily working with Ruby on Rails (13+ years of experience) and JavaScript/TypeScript (10+ years of experience). Also: Clojure, Common Lisp, C, Swift, etc. Always happy to pick up new skills and technologies.

Languages

Fluent in English, French, Russian. Conversational Japanese, basic Mandarin Chinese and Spanish.
