Gosha Tcherednitchenko

Full-stack software engineer — London, U.K.
mail@gosha.net | https://gosha.net | https://github.com/goshatch

I value product insight and care for the people who use that product over technical dogmatism, and I know when "I don't know, but let me find out" is the best possible answer.

Relevant work experience

2021–now **Indeed Flex** (London, U.K.) Software engineer (contract)

Full-stack engineer on the Internal Operations team, building and improving tools that enable operational excellence across the company as it undergoes rapid growth.

2019–2020 **Natural Sitter** (Remote) Tech lead (contract)

As the sole engineer on a 3-person team, designed, built, and launched a pet-sitting platform serving the Tokyo area, together with the supporting infrastructure — CI/CD, payments, etc.

2018–now **A Possible Space** (London, U.K.) Partner

Leading a small, multi-disciplinary creative studio, taking on projects at the intersection of technology and the visual arts.

2016–2017 **Moneytree K.K.** (Tokyo, Japan) Software engineer (contract)

As part of Moneytree's front-end engineering team, helped build the mobile Web app to feature parity with native apps, and helped migrate the tooling from Angular to React.

2013–2016 **AQ** (Tokyo, Japan) Technical director, THEN Software engineer (contract)

As AQ's first engineering hire, put in place engineering systems, processes, and best practices, while at the same time working on diverse client projects, ranging from prototyping work to full-scale web apps. By the end of my tenure, AQ has acquired the capability of taking on engineering work in addition to the company's well-established design business. Clients: Google, ASICS, Seiko, etc.

2011–2013 **COOKPAD Inc.** (Tokyo, Japan) UI Engineer

As part of the UI team, helped bring a mobile-first UI to one of the world's larges Rails apps, serving a multi-million-strong audience on a daily basis. As part of the internal start-up team, launched a cooking school search engine featuring various business tie-ins.

2010–2011 **Local Republic** (Berlin, Germany) Co-founder

Co-founded a civic tech startup aimed at empowering local communities to work together and collaborate with local governments to solve local issues. Responsibilities included UI/UX design and development, customer success, and more.

Education

2019 **Royal College of Art**, M.A. Photography
2010 **Keio School of Media Design** × **P2PU**, Digital Journalism
2005 **EPITECH**, M.Sc. Information Technology

Tech stack

Primarily working with Ruby on Rails (13+ years of experience) and JavaScript/TypeScript (10+ years of experience), Clojure (1+ year of experience). Happy to pick up new technologies.

Languages

Fluent in English, French, Russian. Conversational Japanese, basic Mandarin Chinese and Spanish.
